

Software Engineer (male/female/diverse)

Job Description

As a software engineer, your responsibility is to deliver high quality software components built upon our current cloud-native platform to satisfy our customers in the Life Science market. The position reports to the Research & Development organization. It is a remote full-time position with 40 working hours per week. Xavo is an equal opportunity employer and will consider all applicants if they comply with the capabilities and prerequisites listed below.

Responsibilities

- Analyzes complex requirements, breaks them down into units of work (i.e. stories) and estimates the level of effort required to implement them
- Designs, develops, modifies, and implements software components
- Adheres to all aspects of development from the use of validated technology and workflow to internal prescribed coding standards
- Ensures developed software meets all requirements of quality, security, modifiability, extensibility, scalability and performance

Required Skills & Capabilities

- 3+ years of professional experience in developing web-based applications
- 1+ years of professional experience in software development using JavaScript/Typescript and NodeJS
- Excellent analytical skills
- Good working knowledge of English
- Good writing and communication skills
- Ability to work as part of a team
- Strong time management skills
- Degree/certification in Software Engineering or related field

Desired Skills and Capabilities

- 3+ years of professional experience in software development using Angular, NestJS and common RDBMS such as PostgreSQL
- 3+ years of experience developing software products in a Research & Development department of a software company
- Experience in Life Science R&D processes

Our Offer

- A professional experience that's equally interesting, inspiring and challenging in the growing Software market with the opportunity to continuously learn and self-improve
- Adequate compensation and benefits
- A collaborative environment where team play is the main mode of operation

Applications are to be submitted to career@xavo.com.
